

RUSSELL CREEK PARK SYNTHETIC TURF FIELDS FAQ'S

1. **How long will the construction last?** By contract, the contractor has 10 months to complete the project. The fields are scheduled to be back on-line in February 2022.
2. **Will the construction affect any other fields?** No, the bulk of the construction will take place on Fields A & B only. The project also includes adding ball nets or backstops to all of the other fields on the south side of Russell Creek Park, Fields C, D, E, F, G, and H. The net and backstop construction is not on the field and will be scheduled to avoid any conflicts. For playground improvements and information, please check the webpage.
3. **Will the construction close the parking lot or the park road?** The parking lot located at the southern end of the park, adjacent to Russell Creek Drive will be closed for the entire construction period. This will include through access. The adjoining parking lots and park road will not be closed during construction.
4. **Where will construction trucks/traffic enter the park?** All trucks and construction traffic has been planned to enter off of McDermott only. There should not be any trucks/construction traffic on Russell Creek Drive or Gifford.
5. **How many trucks will be entering Russell Creek Park for the construction?** There will be a significant number of trucks entering the park. Synthetic turf fields require a 12" deep gravel base for stability. The number of trucks delivering gravel only is estimated at 750. There will be additional construction trucks delivering equipment, materials, and supplies.
6. **Will the park be closed?** The only area of the park being closed is the Field A & B area and the south parking lot area. The rest of the park will be open. For playground improvements and information, please check the webpage.
7. **What is the cost to build the two synthetic turf fields?** The construction cost is \$4,015,338.
